

Required Immunizations for Travel to Ghana

COVID-19

Proof of COVID vaccination is required to enter the country.

Yellow Fever

Travelers must present a certificate of vaccination against yellow fever (“yellow card”) to enter the country. This vaccination is required to have been administered at least ten days prior to travel.

Malaria

A malaria prophylactic is highly recommended. We suggest that you visit your doctor at least six weeks prior to the trip to account for any medications that may be needed.

Typhoid

An oral typhoid vaccination, also prescribed by your doctor, is highly recommended.

Be sure to talk with your doctor and check the [CDC website](#) for full guidelines.
